IMAGIN

ImageMaster USB Camera Setting in Suni Mac (Radiovision):

1) Follow the software upgrade instructions listed below for the latest SuniMac build to enable the capture buttons on the ImageMaster camera:

   a) Download the upgrader from the link below:

   http://www.radiovisiondigital.com/RadioVision/Downloads_files/SuniMac_B343.pkg

   b) Uninstall the existing SM from the computer, the best way to do it is to drag the SM icon from the Applications folder into the recycle bin.

   c) Restart the computer and run the installer, then follow the prompts in the installation process to complete it.

   d) Restart the computer and launch SM, you should have the newer version b343 installed.

2) To start taking images with the camera, select the "open camera" icon on the main window.

3) Capture the images by pressing either the top or bottom capture button on the camera.
